Experience

Programmer - Junior Specialist

National Information Processing Institute

December 2021 – June 2025

- **software development and maintenance:** participated in the development of new features and maintained existing applications.
- **cross-team collaboration:** worked closely with backend and frontend teams, analysts, and testers to refine business requirements, improve code quality, and optimize application functionality.
- **testing and debugging:** developed unit tests and implemented bug fixes for both backend and frontend.
- **requirements analysis:** analyzed and interpreted business requirements provided by analysts, taking into account client and end-user needs.
- **SCRUM methodology:** engaged in daily team meetings (daily stand-ups) and regular sprint reviews, enabling efficient task management and improved team communication.

Key achievements:

- **integration of SQL and NoSQL databases:** adapted a project to work with both SQL and NoSQL database engines (MongoDB and Oracle) simultaneously.
- **PDF document templates:** implemented PDF generation based on backend application data and embedded/merged other PDF files with existing ones (using pdfmake and pdf-lib frameworks).
